# LubeRite™ Lubrication System

*Prevent fluid contamination and costly downtimes with LubeRite™ lubricant dispensing containers*

**Ideal for lube oils, hydraulic oils, motor oils, coolants**

**Durable, easy-to-use LubeRite™** storage and dispensing containers protect against lubricant contamination to reduce machinery downtime. HDPE lids feature a fully sealed system which keep dirt and dust out and reduce dangerous and costly spills. Lid includes 8 colored synthetic bands for content identification. Unique features include:

- Anti-fatigue on/off breather vent that provides smooth-flow pouring and offers a full five-finger grip while topping off.
- Quick-fill port which minimizes exposure to airborne contaminants ... no need to remove the entire lid during refilling.
- Accessory port that accepts quick disconnect couplings.

HDPE translucent drums have graduated markings to measure liquid level. Square, stable shape makes the most of available space. Adhesive backed pouch comes with colored cards which match colored lid bands for "No Mistake" fluid identification.

Drums, lids and accessories sold separately. Easy mix 'n match system minimizes inventory and lets you create a container to fit your specific need.

For easy ordering of a complete item, see ready-made sets below.

### Construction:

**Drum** – High Density Polyethylene (HDPE)

**Lid** – HDPE with nitrile (Buna-N) o-rings

**Pump** – HDPE handle with T6 aluminum tube, nitrile (Buna-N) o-rings. PVC hose is reinforced with imbedded metal wire.

**Ext. Hose** – HDPE nozzle with reinforced PVC hose, Nitrile (Buna-N) o-ring.

**Zippered pouch** – 2.3mm thick clear PVC.

**Simple Color I.D. System** — Every drum comes with a standard pouch and four double sided color cards for eight color choices. Every lid comes with eight color bands.
