

Safety Containers FOR LABORATORIES

Reliable dispensing features at an economical price.

Safety Dispensing Cans have all the benefits of Justrite's Type I cans, plus added features to make these the choice of lab professionals for safe dispensing of hazardous liquids into test tubes, small flasks and beakers. Fill spouts have self-closing pressure-relief caps and double-mesh flame arresters. Self-closing taps provide trouble-free dispensing. Cans fitted with the 08540 tap offer more controlled dispensing, while tap 08902 provides a greater flow.

Polyethylene Dispensing Shelf Can has superb corrosion protection, and a unique current-carrying carbon insert embedded into the container allows for proper earthing. All styles are FM approved.

Steel & Poly Shelf Cans have a tap mounted 51 mm above the bottom to eliminate the need to lift the cans during dispensing.

Steel Tilt Cans have a tap on top and the can rests in a sturdy metal cradle. Cradle base measures 351 mm x 356 mm.

Safety Dispensing Cans for Laboratories
