

# Understanding Justrite Gator® Spill Control Products

This comprehensive selection of spill containment products provide a safe, convenient solution to spill control, drum handling and storage, liquid dispensing, as well as transport of hazardous materials for disposal. Justrite's innovative features and GATOR-Tuff construction will support work flow and offer protection for years to come.

## The Gator® Advantage

*Overall, a better quality product designed to give customers more... more protection, more security and more convenience.*

Justrite's Gator® line offers the ultimate protection against leaks and spills. "Gator-Tuff" polyethylene products offer secondary containment to catch hazardous spills before they become a problem! Spilled liquids are captured to help prevent contaminating factory floors, drains, and outside groundwater. You're not only protecting the environment... but saving money in the process by:

- reclaiming captured spills for reuse
- avoiding high costs associated with hazardous material clean-up
- preventing slip and fall injuries to safeguard employees
- avoiding fines with compliance to EPA and UFC regulations

Gator® also helps to organize your drum storage, segregate liquids for easy identification, and makes drum handling safer and easier.

## Superior Design Features

- Drum handling and spill control products are molded in a dark gray color, preferred for its ability to hide dirt and keep workplaces looking clean. Superior "Gator-Tuff" engineering and quality 100% polyethylene is nearly impervious to chemicals including acids and corrosives and provides durability for long lasting value. iDAC™ and Spill Pallets provide fully EPA compliant spill protection.
- Accumulation centers offer a low profile to facilitate drum placement and provide a safer more convenient working height when collecting or dispensing liquids out of standard 55-gallon drums – and when used with Sump-to-Sump™ Drain Kit, can be made EPA compliant.
- Spill Containment Caddy and Drum Management systems feature "open view" sumps making spill detection simple and clean up easy. Seamless construction eliminates leaks.
- Overpacks offer exceptional durability with simple twist on lids for convenience. United Nations "X" rating gives customers the security of extensive testing and the highest possible performance rating.
